

Java/C++ Developers

MSS are looking for software engineers with the following profile:

- Five plus years C++11, experienced in multi-threading, lambdas, templates, etc.
- Five plus years Java, experienced in multi-threading, EJBs, reflection and JDBC.
- Experienced in socket communications in both languages.
- You have excellent Linux or other Unix skills.
- Solid experience with Java container based web apps.
- You are comfortable working remotely from home and don't need full time oversight.
- You're happy to travel, internationally, if needed.
